ABOUT STEM CELL SKINCARE

AnteAGE® uses the latest breakthroughs in stem cell science to effectively recharge your skin's natural healing response.

Stem cells give off a portfolio of proteins, including growth factors and cytokines, grown in a laboratory culture and specially formulated to prevent signs of aging at the cellular level.

CLINICAL STUDY RESULTS

AFTER 30 DAYS PARTICIPANTS

Experienced skin tone improvements

Noticed smoother skin texture

Saw a reduction of fine lines

Reported an increase in skin brightness & tone

WHAT'S INCLUDED

ANTEAGE® SERUM

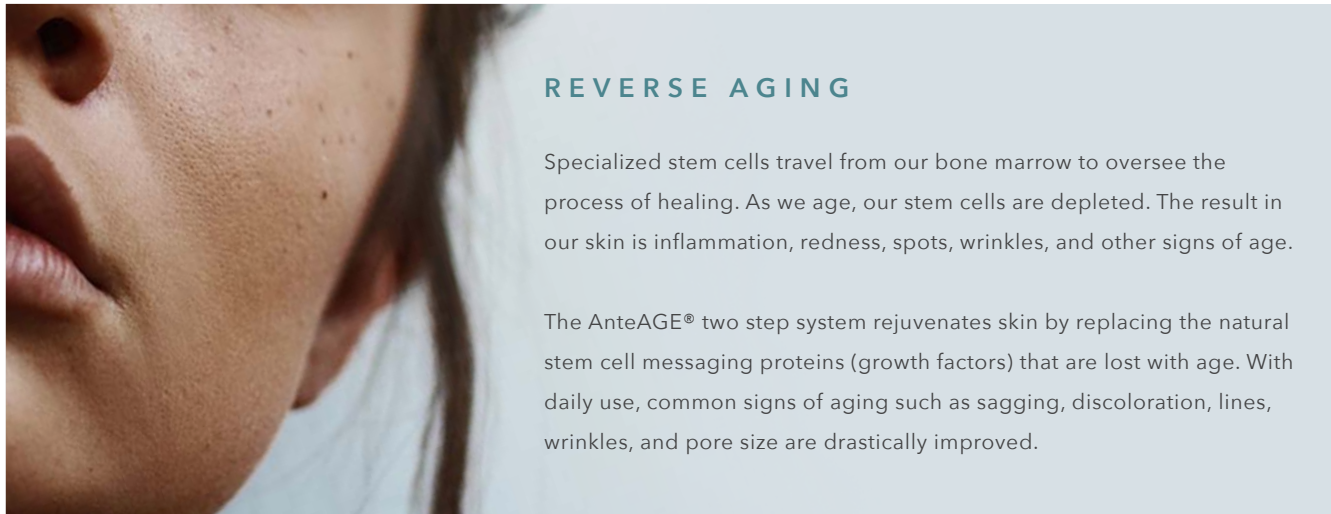

A fast absorbing aqueous formula containing high concentrations of Stem Cytokines and six additional skin rejuvenating actives.

ANTEAGE® ACCELERATOR

Powerful moisturizers and twelve revitalizing actives deeply hydrate and nourish the skin, enhancing the pro-healing and anti-inflammatory effect of the AnteAGE® Serum.

TWO STEPS
TWICE DAILY

REVERSE AGING

Specialized stem cells travel from our bone marrow to oversee the process of healing. As we age, our stem cells are depleted. The result in our skin is inflammation, redness, spots, wrinkles, and other signs of age.

The AnteAGE® two step system rejuvenates skin by replacing the natural stem cell messaging proteins (growth factors) that are lost with age. With daily use, common signs of aging such as sagging, discoloration, lines, wrinkles, and pore size are drastically improved.

KEY ACTIVE INGREDIENTS

STEM CELL
GROWTH FACTORS

HYALURONIC ACID

VITAMIN C

VITAMIN E

EVERYTHING YOU NEED

The AnteAGE® system makes it easier than ever to take control of your skin, giving you all the benefits of a complicated skincare regimen in just two simple steps.
