JetPeel

Innovation. Feels Beautiful.

JetPeel® by TavTech is revolutionary technology that is changing the face of aesthetic treatment.

Based on subsonic jet stream application, JetPeel enables fast transdermal delivery with no needles, no pain, no scar tissue and no downtime.

The world's first and only beauty technology of its kind, JetPeel is clinically proven to provide instant, same day, visible results, in a non-invasive, comfortable and relaxing treatment.

For leading cosmeticians and dermatologists worldwide, JetPeel takes aesthetic care to the level beyond advanced, providing clients with an experience that feels as beautiful as the results.

JetPeel

Technology - Streams of Beauty

The JetPeel device generates pressurized gas accelerated to manipulate liquid into fine misty jet streams, travelling at subsonic speed of over 200 m/s. Applied with an advanced JetPeel wand, the jet stream exfoliates the epidermal layer and gently stretches the skin surface, opening microchannels that allow for non-invasive delivery of nutritive micro droplets deep into the skin.

Used in conjunction with Jet Solutions for a wide range of skin applications, JetPeel transdermal delivery technology is everything that standard aesthetic treatments are not: JetPeel is effective, comfortable and pain free.

JetPeel

The Technology Behind JetPeel

JetPeel devices are based on exclusive patented Jet Technology developed over many years of advanced R&D. It uses fine jet streams of misty pressurized liquid, applied to the skin via an inimitable handpiece, enabling effective transdermal delivery to repair and rejuvenate the skin from deep within. All this is done without any invasive action, no scarring, no recovery time needed. All comfort, all results.

TREATMENT SEQUENCE

STEP
01

LYMPHATIC DRAINAGE

A pleasant and relaxing massage useful for detoxifying the skin and stimulating micro-circulation

STEP
02

HYDRA DERMABRASION

Removal of dead skin cells prepares the skin to receive nourishment in the Infusion stage

STEP
03

HYDROPORATION

This step provides effective and deep delivery of active ingredients into the skin

STEP
04

BOOSTER INFUSION

This optional step can be included to boost the treatment result

JetPeel

Device - Care Meets Comfort

JetPeel technology is versatile for a range of treatments and applications, including JetPro for beauty and aesthetic treatments, and JetPeel 3V for dermatological and other medical use. All devices are equipped with the patented JetPeel handpiece that facilitates delivery of jet streams to the deepest skin layers with a comfortable touch.

A diver is shown in a streamlined, horizontal position underwater. The diver's body is covered in a blue, bubbly, skin-like texture that appears to be peeling or bubbling away, revealing a smoother surface underneath. The diver is wearing a black cap and goggles. The background is a dark blue gradient. On the right side, there are several thick, curved, light pink lines that sweep across the frame. The text "DIVE DEEP UNDER THE SKIN" is positioned in the upper right quadrant.
